

**A most alarming report came from
Dr. Ronald Heberman, MD**
Who is the University of Pittsburgh Cancer
Institute's Director, UPMC Cancer Centers
Chief, & Professor of Oncology.

**THIS IS HIS WRITTEN MEMO TO THE
UNIVERSITY OF PITT. FACULTY AND STAFF**

"Recently I have become more aware of the growing body of literature and studies linking long-term cell phone use to possible adverse health effects including cancer. Although the evidence is still controversial, I am convinced that there is sufficient data to warrant issuing an advisory and to share some precautionary advice on cell phone use".

An international expert panel of pathologists, oncologists and public health specialists recently declared that electromagnetic fields (EMF's) emitted by cell phones should be considered as a potential human health risk.
